SinoCorrugated 2017 will be held together with SinoFoldingCarton 2017 and China Packaging Container Expo 2017 to occupy 8 exhibition halls with nearly 110,000 square meters of exhibition areas. Its scale has far exceeded SinoCorrugated 2015: by the end of January 2017, 93.4% of the overall exhibition areas have been filled, while we have confirmed 442 Chinese and international leading brands as SinoCorrugated 2017 exhibitors.

Meanwhile, as of February 17, the onsite pre-registration number has been boosted up to 50,841 persons, which covers diverse professional buyers with high purchasing power. In general, the quantity of both exhibitors and audiences will far surplus SinoCorrugated 2015. I believe that SinoCorrugated 2017 will be one of the most rewarding professional corrugated expo throughout the history. For

the sake of providing suitable production and management solutions for Chinese and international packaging enterprises at different levels of development, and to systematically display the future of the industry, SinoCorrugated 2017 will showcase 7 effective production & management solutions featuring cutting-edge processing technology:

- 1. Solution for Raw Paper Procurement and Management**
- 2. Solution for Energy Saving, Pollution Reduction and Waste Collection & Recycling**
- 3. Solution for Intelligent and Cost Effective Paper Board Manufacturing**
- 4. Corrugated Box Pre-Printing Solution**
- 5. Solution for small-batch ordering and digital printing of corrugated boxes**
- 6. Solution for Efficient Printing & Converting module Integration**

7. Solution for Intelligent Logistic and Storage Management Equipment Configuration

Solution for Raw Paper Procurement and Management

features comprehensive collection of diverse industrial paper for buyers' one-stop paper procurement experience, which also provides convenient procurement of raw materials, especially when pricing of Chinese raw papers are rising dramatically in recent years. The solution provides an opportunity for in-depth technical exchanges between the upstream and downstream industry, through which, the raw paper manufacturers will understand more about the demands of box makers and foresee the future trends of the industry. On the other hand, corrugated companies will build more networks with raw paper suppliers and gain more knowledge about their products. At SinoCorrugated 2017, visitors will see a collection of various mainstream Chinese raw paper suppliers as well as companies such as CHANGCHENG, Onego,

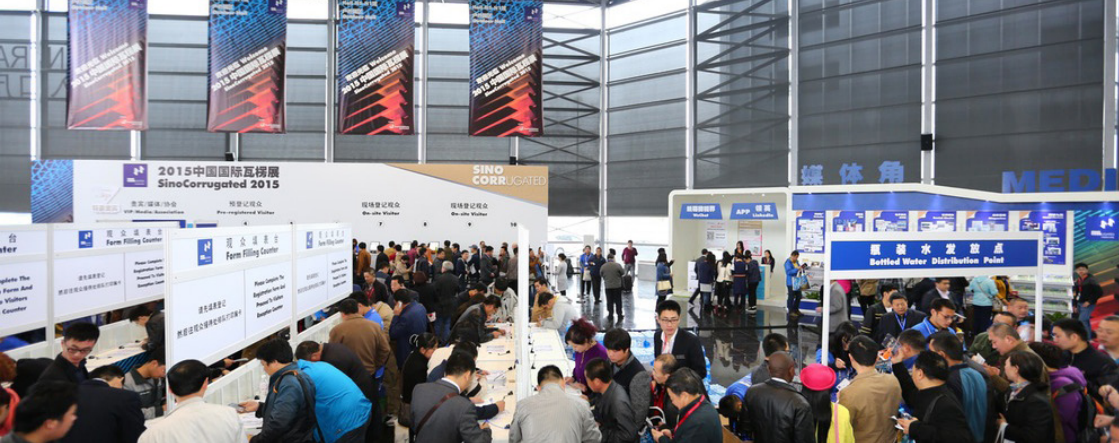

Kika, YunChou who will showcase over 10 kinds of imported paper brands.

Solution for Energy Saving, Pollution Reduction and Waste Collection & Recycling

mainly features temperature control, energy-saving, loss-reduction technology, waste water treatment, and waste paper recycling solutions applicable to corrugating lines. Some of Representing Exhibitors Heatech, Suzhou Union, XT Pack, Jewel Packing, High Yan, Kenhua.

Solution for Intelligent and Cost Effective

Corrugated Board Manufacturing ensures the intelligent and efficient corrugated board production process. The solution highlights corrugating lines with production speed of over 200 m/min with width of 2,800mm, 2,500mm and other options. Intelligent high-speed corrugating production line ensures high efficiency, manpower saving, and a more intelligent production management system with an easier operation. It is a highly effective choice for corrugated

board production enterprises to enhance production capacity. The exhibiting solution providers **include but not limited to: BHS, Mitsubishi Heavy Industries, Taiwan Yueli, Hsieh Hsu, Taiwan K&H, Taiwan Ming Wei, Wanlian, Xieyang, Dong Chuang, and Meiguang.**

In addition, SinoCorrugated 2017 will present the unique Corrugated Box Pre-Printing Solution, which is suitable for producing large batch of customized products. It is more environmentally friendly in comparison to offset printing, and also ensures production efficiency and high quality of the products. Nowadays, corrugated pre-printing technology has been widely used in high quantity beverage and food container packaging (such as milk, beer, fruit and others). SinoCorrugated 2017 has gathered many well-known Chinese and international pre-printing brands, **such as Switzerland BOBST Group, CONPRINTA, Taiwan Kuen Yuh, Yigaofa, Donghang, Yongcheng, Qingzhou SG•ONE, Aerospace-Huayang, Shaanxi Beiren, OLG**

and many more. At the same time, there will be numerous innovative platemaking equipment, plates and platemaking service providers, as well as ink accessories and consumables suppliers at the exhibition, who will guide the visitors through the entire pre-printing production chain.

Specialized exhibiting solution providers are listed as follows:
A: Printers: BOBST Group, CONPRINTA, Shaanxi Beiren, Aerospace-Huayang, Yigaofa, Dong, Yongcheng, Qingzhou SG•ONE, Xi'an KNWA, OLG, Taiwan Kuen Yuh and etc.

B: Platemaking equipment, plates and platemaking service providers: Lucky Huaguang, Baiyun Kemao, Meiju Chemical, Biolane, Zhanyi, Adasion, Flexo, Chunyi and etc.

C: Ink accessories and consumables Suppliers: Sky Dragon Printing Ink, Yingke Printing Ink, Shanghai Gethray, Shandong Dechuang, Jiajing, Mikuni, Yashi, Auclean, Yuncheng, MingYang, Chuen Fong Wang and etc.

Abundant on-site activities and events

Solution for small-batch ordering and digital printing of corrugated boxes mainly displays the “corrugated digital printing” equipment and production

solutions. As the contemporary packaging printing industry demands more and more small batch ordering and corrugated box customization, digital printing solution will represent the direction of future printing trends. In addition, the application of digital printing program can relatively reduce cost in box samples production while increase printing efficiency. Some corrugated companies also apply this technology in manufacturing creative corrugated products. At present, there are more than 10 Chinese and international suppliers of digital printing equipment have confirmed their presence at SinoCorrugated 2017, **such as EFI, BARBERAN, HP, KBA, LANDA, Kodak, Haike, Scodix, Boye, Shenzhen Wonder, Shenzhen Handway, Jiangmen Jingou, Teckwin and so many more.**

Solution for Efficient Printing & Converting module Integration increases efficiency in the corrugated box finishing process, so that simplifies the management

procedures within corrugated factories. The implementation satisfies the need of on-demand production and inventory control, which will also release manpower from manual operation of Gluter, Stitcher, Strapper and Stackers while maintaining high quality control of the finished products. SinoCorrugated 2017 will not only display integrated printing, slotting and forming lines suitable for large orderings of corrugated boxes, but also displays corrugating lines satisfying majority of the small and medium-sized corrugated companies.

At SinoCorrugated 2017, BOBST Group, Nantai, Ming Wei, Baowang, Dinglong, Keshenglong, Vippro, Pinlong Seiko, Juer, Yijinda, Hebei Shengli, Qingdao Meiguang and more than 20 enterprises will display advanced solutions and a variety of equipment configuration programs. Finally, SinoCorrugated 2017 has specially launched the **Solution for Intelligent Logistic and Storage Management Equipment Configuration.** The solution covers cutting-edge technologies and equipment of intelligent logistics, information system integrator, industrial robots and many more. As we all know,

Gathering the global leading brands of the industry to build a one-stop procurement platform

visualized and intelligent logistics systems are the foundation for all intelligent corrugated factories. The adoption of intelligent logistics can greatly improve the production efficiency, reduce process losses and decrease surface damage of finished products. Up until now, the confirmed solution providers include: **BDS, Kawasaki, OM Partners, FUJI, Naili, Ming Wei, YCM, Zerone, Fuji** and other international brands of mature technology.

At SinoCorrugated 2017, we invite machineries and consumable suppliers to collectively provide integrated solutions to satisfy demands of corrugated companies. In accordance with the cooperative integration of the solutions, we offer an exhibition platform for corrugated board and box manufacturers to compare the values of the exhibits rather than merely the prices. That is to say, it is the most suitable product that will bring highest ROI of corrugated companies, not the cheapest ones. We help buyers to find the accurate positioning of their own company and to find the most suitable equipment and production solution for their own

development. Moreover, the solutions, on-site conferences, and factory tours post the exhibition will allow corrugated factories to understand the real development trend of the whole industry through one exhibition visit. SinoCorrugated 2017 will cover almost all potential solutions for the operation of large, medium and small corrugating companies at different stages of development. Of course, we have also offered a lot of opportunities for corrugated factories to expand business and seek for international investment.

It can be said that these 7 solutions at SinoCorrugated 2017 will cover almost all advanced technologies and hot topics of the global corrugated industry. Packaging enterprises at various stages of development can find customized solutions for their own benefits. I believe that SinoCorrugated 2017 will be one of the most rewarding professional corrugated expo throughout the history. I am looking forward to seeing you on April 11-14 at the Shanghai New International Expo Centre!
