

HARPER CORPORATION OF AMERICA *Now Servicing Asia from the United States*

Charlotte, North Carolina, October 16, 2017—Global anilox roll supplier Harper Corporation of America approaches a new direction as Harper commits to maintain its promise to offer the best quality products, technology, and outstanding customer service and support. Therefore, it is with our deepest regret to announce that Harper Corporation of America will no longer have a licensee in Thailand.

The company has made the decision to end its relationship with Harper Asia/Pacific Company, Ltd. by not renewing the licensee agreement going forward. Harper Corporation of America will now process all orders from Asia directly from its corporate headquarters in Charlotte, North Carolina. The company ensures that the recent change in manufacturing locations will not interfere with the quality of service that customers from Asia receive. Harper is confident that it can best serve its customers,

agents, distributors, and industry from the Charlotte location. Harper Corporation of America values its relationships with its agents and distributors and looks forward to continuing these relationships moving forward. The company is dedicated to continuing to provide leading innovation and support within the flexographic industry.

As a worldwide company, Harper Corporation has two manufacturing plants in North America – Charlotte, North Carolina and DePere, Wisconsin – which serve Canada, the United States, Latin America, Europe, and Asia.
